

- Momentive has joined [Together for Sustainability \(TfS\)](#). TfS is a procurement-driven initiative created by chemical companies to assess, audit, and improve sustainability practices within their supply chains.
- A key strategy in our sustainability efforts is to collaborate with our suppliers to participate in TfS assessments (using [EcoVadis](#), the world's most trusted provider of business sustainability ratings) and TfS audit programs with a focus on improvement actions, where appropriate.
- The [TfS Academy](#), an online sustainability training platform, is offered to our suppliers free of charge.
