

Super Spreaders and Super Penetrants for Exceptional Coverage

Adding a Silwet™ super spreader or super penetrant to your tank mix can help save time, increase yields and boost profits. With increased adhesion, maximum spreading and rapid penetration, when needed, more of your active ingredient can be delivered across the plant surface where needed, providing improved performance with lower spray volumes and less waste.

With exceptional coverage and rapid penetration when needed, you can maximize your spray treatment performance and minimize waste.

SPREAD UP TO 10X MORE

RAPID INFILTRATION
(WHEN NEEDED)

RAINFAST IN AS LITTLE
AS 2 MINUTES

IMPROVED ADHESION TO
THE PLANT SURFACE

EXCEPTIONAL
COVERAGE

Reliability You Can Count on Backed by 35 Years in the Field

Silwet™ super spreaders and super penetrants are the industry standard. Used in the field since the 1980s, Silwet super spreaders and super penetrants have earned their reputation for complete coverage and maximized spray treatment effectiveness. From their origins as the first tri-siloxane spreader on the market, Silwet super spreaders and super penetrants are available today in a wide range of products and advanced formulations expertly developed to give you the performance you need.

Key Features and Typical Benefits

- Up to 10X more spreading vs. conventional adjuvants
- Cover more area per tank with lower spray volumes
- Reduced run-off and wasted agrochemicals
- Rainfast in as little as 2 minutes after application
- Mixes easily with a broad range of agrochemicals
